PROFILE

Frontend Developer with 3 years of experience building scalable business applications using React, JavaScript, and REST APIs. Skilled in dashboard development, API integration, state management, responsive design, and performance optimization.

PROFESSIONAL EXPERIENCE

Junior Software Engineer (Frontend) June 2024 – Present
Cygnonex Innovations Private limited *Ernakulam, India*

- Engineered and enhanced React-based UI modules supporting billing, inventory management, and reporting workflows used across multiple business functions.
- Designed reusable and configurable components, **reducing frontend code duplication by approximately 30%** and improving long-term maintainability.
- Integrated RESTful APIs and managed shared application state using **Context API and controlled component patterns**.
- Improved UI performance by optimizing component hierarchies and **eliminating unnecessary re-renders, reducing load times by up to 20%**.
- Worked closely with backend engineers and product teams to translate requirements into scalable, production-ready UI solutions.

MERN Stack Developer Intern Sept 2023 – Apr 2024
Software Training & Development Firm *Kakkanad, India*

- Built and enhanced full-stack web applications using React for frontend interfaces and REST APIs for backend communication.
- Applied responsive design principles to ensure consistent user experience across desktop and mobile devices.
- Executed CRUD-heavy dashboards using reusable components and predictable state handling, supporting multiple data entities.
- Strengthened understanding of frontend architecture, API contracts, and component lifecycle through hands-on project delivery.

PROJECTS

Multi-Tenant Enterprise Billing and Inventory Web Application ERP

- Built React-based interfaces for invoice processing, inventory tracking, and transaction management, integrating real-time calculations, validations, and multiple backend services into a unified administrative dashboard.

Human Resourse Management System

- Delivered UI modules and integrated APIs for attendance tracking, payroll workflows, and employee record management, focusing on usability improvements and reliable data synchronization through REST API integration.

Animated Product Website Development

- Developed a modern, animation-driven website for showcasing company products, implementing responsive interfaces, interactive experiences, and smooth scroll-based animations.

Real Estate Management Platform (MERN + Stripe) Full stack Project

- Shipped a MERN application featuring authentication, property management, role-based dashboards, and Stripe-powered payment workflows using checkout sessions and webhooks.

EDUCATION

Bachelor of Science (BSc) in Computer Science 2020 – 2023
Taliparamba Arts and Science College, Kannur *Kerala*

CERTIFICATION

MEAN/MERN Full Stack 2024
National Council Of Technology And Training (NACTET)

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+),HTML5,CSS3,Context API,Redux,Chrome Devtools,Tailwind CSS,Bootstrap, Responsive ,GSAP, ,Scroll Driven Animation, Design,Insomnia,TanStack Query,Responsive Design,Framer, Context API, Zod, PWA
Backend : Node.js, Express.js, MongoDB, REST APIs, JWT Authentication, Role-Based Access Control (RBAC), CRUD Operations, API Integration
Tools & Workflow: Git GitHub, Postman, VS Code, Linux, JWT, API Testing, Vite, npm, Agile/Scrum, Chrome DevTools
