Profile

Frontend-focused Software Developer with experience building scalable, production-ready web applications using React and the MERN stack. Strong background in developing data-intensive dashboards, complex forms, and ERP-style user interfaces. Skilled in component-based architecture, state management, API integration, and UI performance optimization. Passionate about clean code, usability, and delivering reliable features in product-driven environments.

Professional Experience

Junior Software Developer (Frontend) June 2024 – Dec 2024 *Product-Based Software Company, Ernakulam, India*

- Developed and maintained React-based frontend modules supporting billing, inventory, and reporting workflows.
- Built reusable and configurable UI components, reducing frontend code duplication by approximately **30%**.
- Implemented complex forms, tables, filters, and modals for data-heavy enterprise screens.
- Integrated RESTful APIs with frontend state using Context API and controlled components.
- Optimized UI performance by refactoring components and minimizing unnecessary re-renders.
- Collaborated closely with backend and product teams to translate requirements into scalable UI solutions.

MERN Stack Developer Intern Sept 2023 – Apr 2024 *Software Training & Development Firm, Kakkanad, India*

- Built full-stack web applications with React-driven user interfaces and REST-based backend services.
- Designed responsive layouts ensuring consistent UX across devices.
- Developed CRUD-heavy dashboards using reusable components and predictable state handling.
- Strengthened understanding of frontend architecture, API contracts, and component lifecycle patterns.

Projects

Enterprise Billing and Inventory Web Application

- Developed frontend interfaces for managing invoices, stock levels, and transaction records.
- Implemented dynamic calculations, validations, and conditional rendering to reduce manual errors.
- Integrated multiple backend services into a unified React-based dashboard.

Employee Management and HR Dashboard

- Built UI modules for attendance tracking, payroll processing, and employee data management.
- Designed intuitive workflows to improve usability for non-technical users.
- Ensured consistent data synchronization through API integration and state updates.

Management System with Real-Time Data Handling

- Developed React-based dashboards displaying structured operational data.
- Focused on UI validation, error handling, and performance optimization.
- Collaborated with backend services to ensure data accuracy and reliability.

Education

Bachelor of Science (BSc) in Computer Science 2020 – 2023 Taliparamba Arts and Science College, Kerala
CGPA: 6.9 / 10

Technical Skills

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Context API, Redux (basic), Tailwind CSS, Bootstrap, Responsive Design
Backend (Working Knowledge): Node.js, Express.js, MongoDB, REST APIs, Authentication, Authorization
Tools & Workflow: Git, GitHub, Postman, VS Code, Linux, JWT, API Testing, Agile/Scrum
